To whom it may concern

Joint Venture Electronics Services has installed its Diamond Parking Guidance System in the undercover parking at the Pick & Pay entrance to the Killarney mall.

This is a pilot installation monitoring 72 parking bays, and has been running since March this year.

We are generally happy with the system and its performance. We have monitored the system and can confirm that its accuracy is close to, if not 100%

Extending the system to other areas will be considered at the end of the trial period early next year.

Kind regards
Dennis Goldman
